

Setting Up and Using DTN Mobile

The first thing you must understand about DTN Mobile is that there are two separate websites to setup and use it:

<http://online.dtn.com> - This site is used to setup DTN Mobile. Here you can select preferences and setup Watch Lists.

<http://mobile.dtn.com> - This site is used to access DTN Mobile and view quotes, news, and weather.

You need to first setup DTN Mobile, then you can access it and view your quotes, news, and weather.

STEP 1, setup DTN Mobile Preferences. From online.dtn.com, setup the following preferences.

Display Width

DTN Mobile optimizes displayed information for either **Extra Large** format devices (300 or more pixels wide), **Large** format devices (between 300 and 220 pixels wide), **Medium** format devices (between 220 and 176 pixels wide), or **Small** format devices (less than 176 pixels wide). DTN Mobile will automatically detect your device's display width unless you override auto-detection by selecting either Extra Large Format, Large Format, Medium Format or Small Format.

Width: Extra Large Format (300 pixels) v

Main Menu Content

Select content to be displayed on your DTN Mobile main menu page. Note: Adding content to your main menu page will make it take longer to load.

A Watch List is list of symbols that you can view in DTN Mobile. You can create your own custom Watch Lists or select from predefined lists such as Currencies, Dairy, Energies, Grains, etc. You can have up to 11 separate Watch Lists.

Default Watch List: this is the first Watch List that appears when you access the Watch List link in DTN Mobile.

Watch Lists: this is the list of Watch Lists (up to 11) that you currently have. This list allows you to edit, delete, display, and move the order of how the lists appear in DTN Mobile.

Add a New Watch List: to add a new Watch List, select:

- Create your own watch list: this allows you to enter your own symbols for futures, options, equities, spreads, or formulas.
- Select a predefined watch list: click the “add” link to add one of the pre-defined Watch Lists. Note that once you add a specific Watch List, it’s link becomes inactive.

Finished: make sure you click the “Finished” button at the bottom right side of the page to save your changes.

For more detailed Help on setting up DTN Mobile, please visit the following web page:

http://online.dtn.com/html/help/ago/9_dtn-mobile/dm_7-0_setup_dtn-mobile-setup.htm

If you are using an iPhone or iPad, you may want to try DTN ProphetX for iOS. For more information, visit the following web page: <http://www.dtn.com/trading/mobile.cfm>
