

Welcome to DTN ProphetX for iOS.

DTN ProphetX for iOS (iPad or iPhone) offers traders and analysts a broad range of market and fundamental data, including quotes, charts, and news, in an easy-to-use dashboard view. To get started please review the following:

INSTALLING TO YOUR iPhone or iPad

- From your device, open the App Store. Enter “DTN ProphetX” into the Search box. On the DTN ProphetX icon, click the “Get” or “Install” button. Follow the on-screen instructions to install.
- After installation, enter your DTN ProphetX Username and Password to login. Note that if you are also running DTN ProphetX for the Desktop, logging into one will automatically log you out of the other.

QUOTE LIST

- To add new symbols or descriptive labels to the Quote List, tap the PLUS SIGN (+) icon. From there, choose one of three Tabs:
 - Category Search Tab: add symbols to the Quote List by selecting them from market categories.
 - Symbol Search Tab: add symbols directly to the Quote List with the Quick Add or Lookup Symbol buttons.
 - Add Label Tab: add descriptive labels (dividers) to the Quote List.
- To delete or arrange the symbols in the Quote List, tap the PENCIL (✎) icon to enter Edit mode. Then tap either the DELETE (⊖) icon or the MOVE (≡) icon. Tap the Done button to exit the Edit mode.

WINDOWS

- To maximize a window for full screen viewing, tap the EXPAND (⊞) icon. To restore the window back to regular size, tap the RESTORE (⊞) icon.

NEWS

- To view a linked News Index for a specific symbol, tap any symbol in the Quote List.
- To view a News Story, tap any story.

NEWS SEARCHES

- To view a keyword News Search, tap the NEWS SEARCHES (≡) icon, then tap a News Search to display.
- To create a keyword News Search, tap the PLUS SIGN (+) icon from the NEWS SEARCHES window.
- To edit, delete, or arrange the News Searches, tap the PENCIL (✎) icon from the NEWS SEARCHES window. Then tap either the DELETE (⊖) icon, the ARRANGE (≡) icon, or the News Search name to edit. Tap the Done button to exit the Edit mode.
- Additional criteria can be used to group search words:
 - Single quotes are used to indicate the words in the search must be within 50 words of each other and can be in any order. For example ‘USDA corn’
 - Double quotes are used to indicate the words in the search must be within 2 words of each other and in the order specified. For example “USDA corn”
 - Parentheses are used to group words together to indicate that all of the words in the group should be present, ignoring order and nearness. For example (USDA corn)

CHARTS

- To view a linked Chart for a specific symbol, tap any symbol in the Quote List.
- To change the Chart Interval, tap any of the INTERVAL (     ) icons.
- To view less/more data within the Chart, use a two finger pinch and expand gesture.
- To view individual data points within the Chart, touch and hold the Chart. Move the data window left/right along the X-Axis.
- When the Chart window is maximized, you will also be given the choice to change the chart type (Bar, Candle, Line) or to add Studies to the chart, by tapping the STUDIES () icon.
- Tabular Window: triple-tap the Chart's description/symbol area and a Tabular Window will be displayed.

QUOTE LIST SYNCING WITH APPLE iCloud

Apple iCloud is a service that can be used for storing your device's music, photos, documents, and backing up your files. If iCloud is enabled on your device, DTN ProphetX will also use it to store your default Quote List. When multiple devices are used to run DTN ProphetX, such as an iPad and iPhone, your default Quote List can be "synced" from one device to the other so that any changes made on one device will be available on the other device. Note that you must use the same iTunes account on both devices.

- For more information on Apple iCloud, see <http://help.apple.com/icloud/>
- You will be given the choice to sync your Quote List the first time you start DTN ProphetX for iOS on a second device. A message will appear asking you which Quote List to use as the initial Quote List:
- Existing Quote List from the first device. Usually, you will select this choice since you may have already customized it with additional symbols and now want that Quote List to appear on your second device.
- New Quote List from the second device. If you select this choice, this new default Quote List will overwrite the Quote List on your other (first) device.
